

PROGRAM MISSION

Foster meaningful research collaborations between first and second year undergraduate students and graduate students from across the humanities, social sciences, natural sciences, and engineering.

“ Thanks to the ReMatch program, I was able to gain hands-on experience working in a neuroscience lab under the guidance of my graduate mentor, Abby, and learn more about some of the topics and methods used in my prospective major. ”

-Serena Mon, Class of 2020,
and ReMatch participant

ReMatch is a collaborative initiative between the Office of Undergraduate Research, the Office of the Dean of the Graduate School, and the Programs for Access and Inclusion.

REsearch MATCH

**YOUR UNDERGRADUATE
RESEARCH EXPERIENCE
STARTS HERE.**

SEPTEMBER

Look through graduate mentor profiles to find graduate students who share your interests.

OCTOBER

Meet graduate mentors by attending one (or more) of the informal *Meet and Greets*.

NOVEMBER

Reconnect with mentors you met at the *Meet and Greets*, meet new potential mentors, and discuss opportunities for mentorship and research at the *Meal for Mentoring dinners*.

DECEMBER/ JANUARY

Participate in one-on-one or small group meetings, intersession research shadowing experiences, lab tours, and other activities with mentors of interest.

FEBRUARY

Once you are paired with a mentor, apply for funding to complete a nine week mentored research internship over the summer.

WHO CAN PARTICIPATE?

Any first or second year Princeton student who's interested in research! Students from a broad range of backgrounds have completed successful research projects - including some who had never set foot in a lab or analyzed primary sources before coming to Princeton. Most importantly, ReMatch is a learning experience, and all of the graduate mentors are eager and ready to share their knowledge and help you get started with research.

ReMATCH + SUMMER PROGRAM

The yearlong ReMatch program culminates in the optional ReMatch+ summer program. Students who wish to carry out paid graduate-mentored research on campus can choose to apply to the summer program. R-SURP participants join a diverse and inclusive community of researchers from across campus. All of the mentors and mentees gather weekly in a research colloquium, where they will receive support and training on collaborative research as well as discipline specific research methods and approaches.
